

Says

What have we heard them say?
What can we imagine them saying?

Thinks

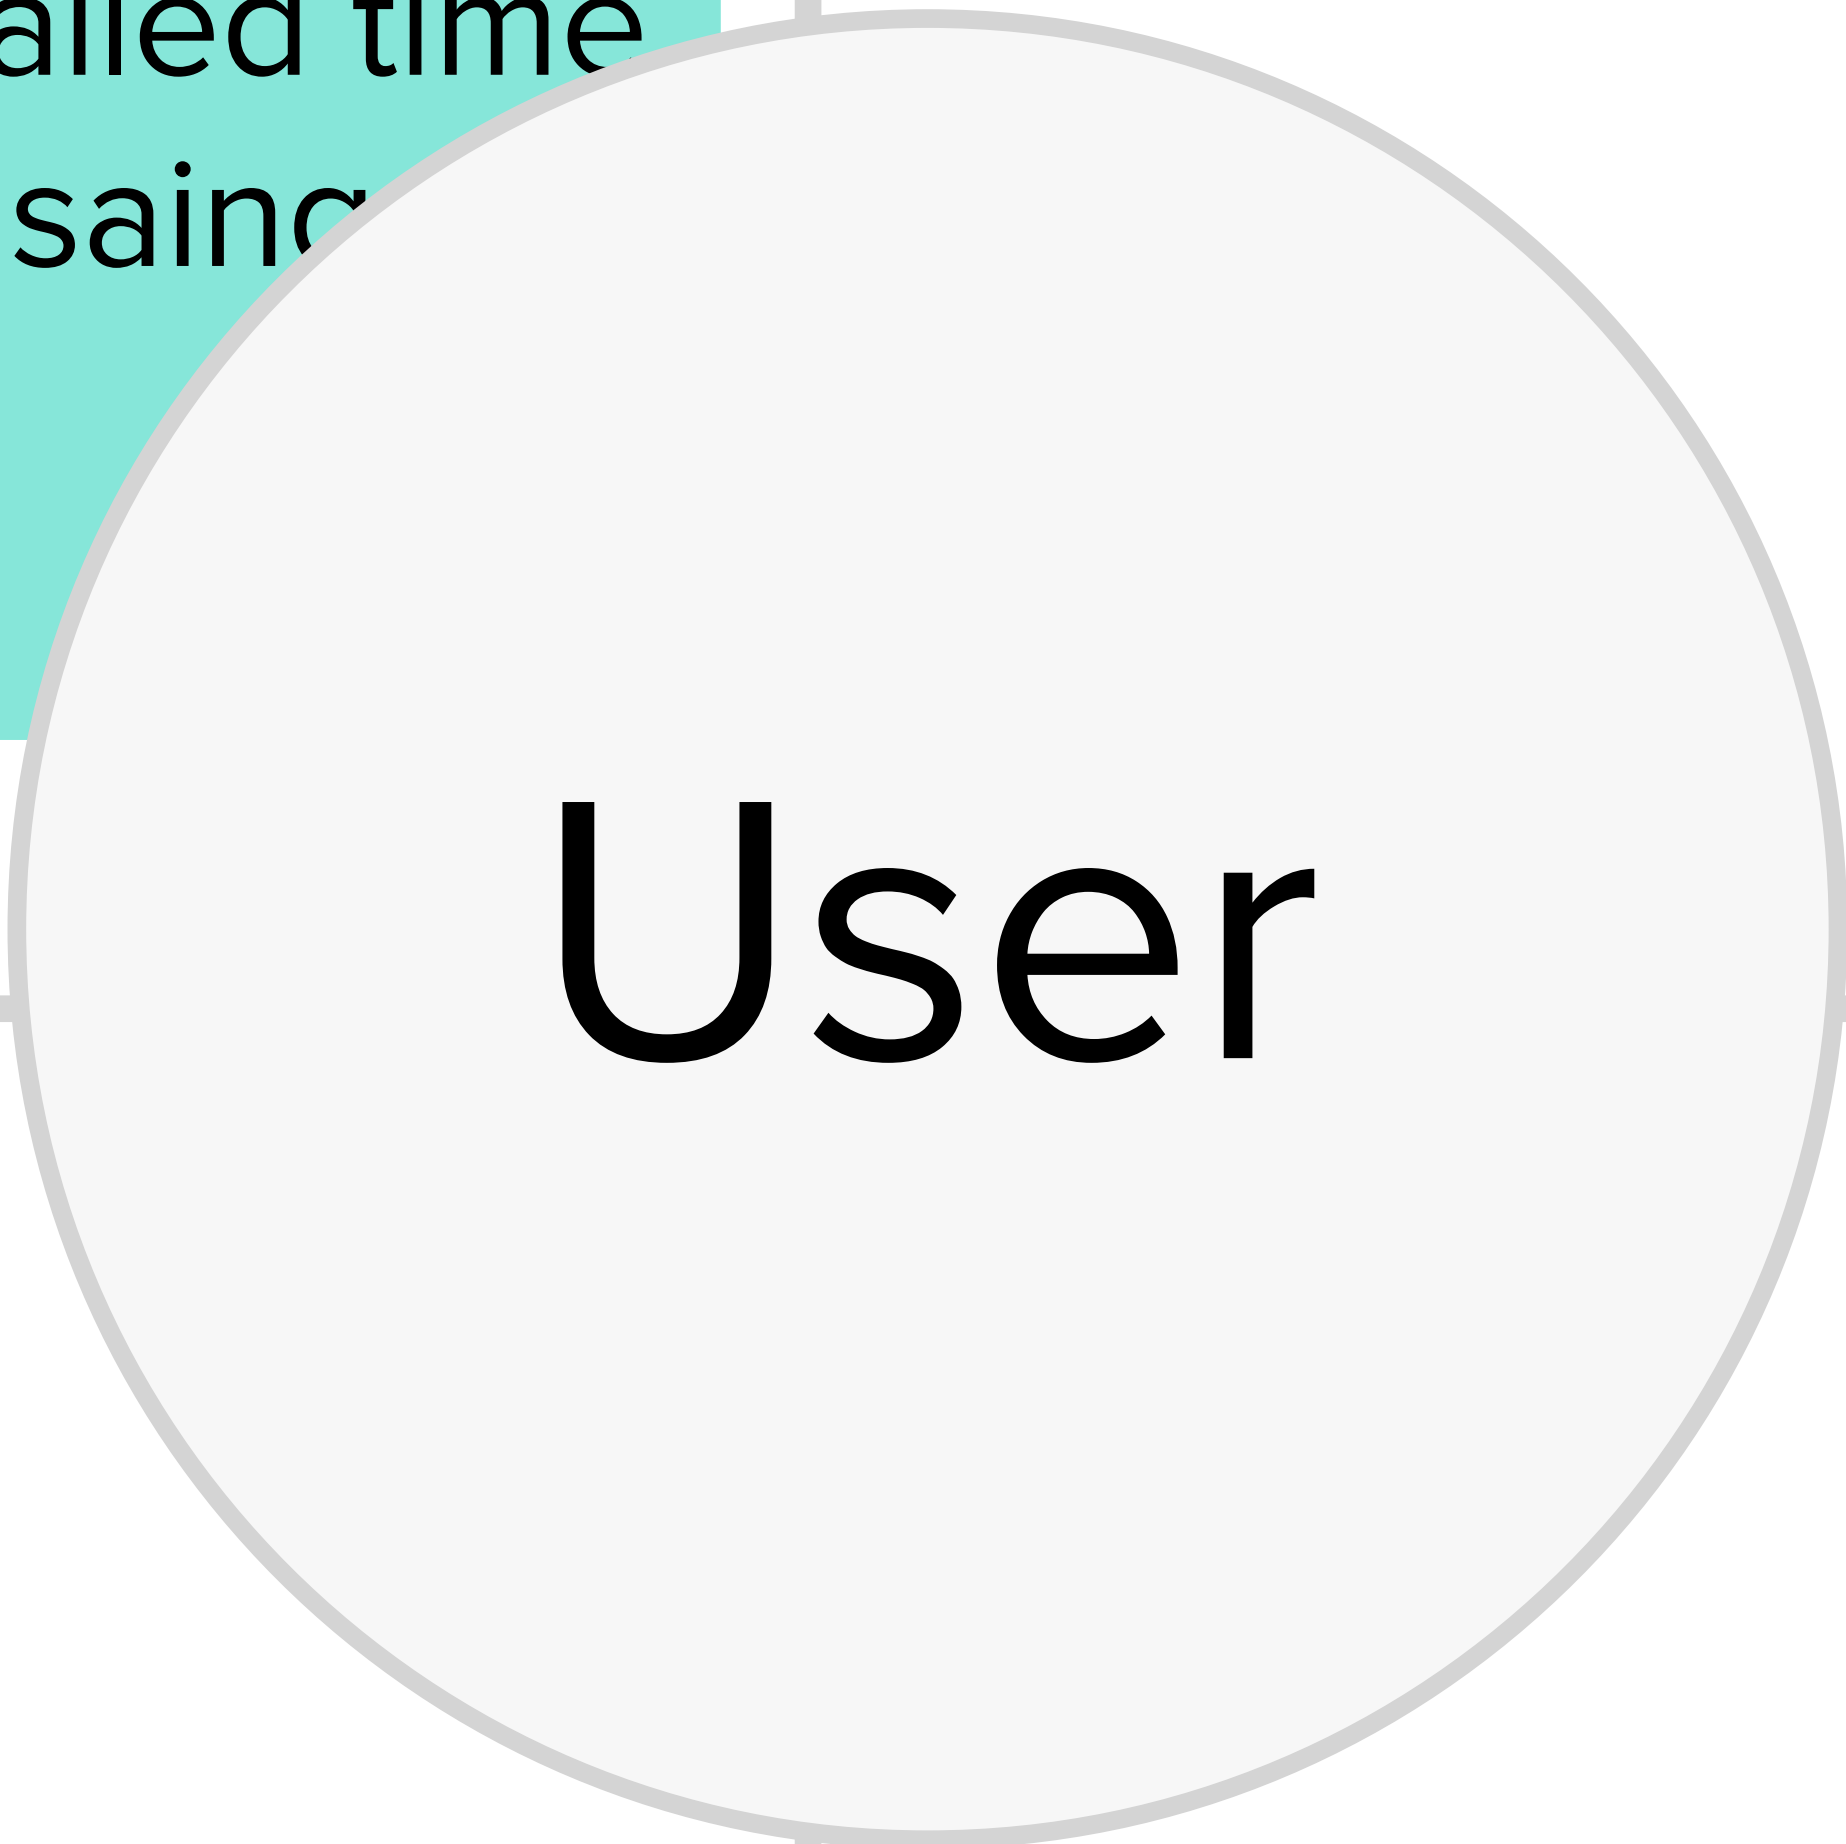

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

This Global Air Transportation Network dataset is a comprehensive collective of information on airports, airlines and their routes.

It contains information such as names, cities, countries, codes (IATA and ICAO) longitudes, latitudes and altitudes of airports across the world with detailed time zone and daylight saving time data.

It also covers route details such as airline sources to destination airports along with essential details like codeshare if any stops required during this journey along with the type of aircraft being used for that particular journey.

This includes information about airlines including their IDs, name aliases, IATA and ICAO codes, callsigns country of origin and active/inactive status.

User

ACR contacted Tableau to simplify how it presents data to customers and accelerate its speed to market.

This dataset has been compiled through meticulous labor by researchers all over the world to provide a comprehensive detail into air transportation networks from around the globe.
